

Please read this before submitting your logo/artwork to us for printing.

In order to ensure your logo is printed correctly, we will need one of the following vector file formats:

- An Adobe Illustrator (.ai) file with ALL fonts outlined, or
- An Encapsulated PostScript (.eps) file with ALL fonts outlined, or
- A Portable Document Format (.pdf) with ALL fonts outlined

If you are unable to locate a vector file, we can accept a raster or JPEG (.jpg) file too. It should be scaled to the intended print size with the following options selected:

- A JPEG saved at Maximum quality and a resolution of 300 PPI

If you have none of these options, our designer can re-create most any type of design, but there may be additional design fees required.

If you have any questions, feel free to contact us at 816-407-7446.
